## os edication

## **7" full-size touchscreen**

bringing a brand new user experience

#### **Intuitive UI design** 80% operation can be done on the main interface.

**Premium material** supports up to 49 disinfectants

See-through window design

easy to clean and observe

syringe status

## Touch the flexibility

### Extraordinary touch experience

BeneFusion n Series features a full-size color touchscreen that comes with an intuitive UI to provide an extraordinary interactive experience as never before.

- 7-inch HD capacitive touchscreen makes the interaction as smooth as using smart devices in your daily life.
- The intuitive UI facilitates an easy operation by presenting critical parameters with an elegant layout.

## All in one

BeneFusion nSP and nVP are versatile enough to integrate all functions to satisfy a variety of clinical purposes.

s smooth as using smart devices in your daily life. critical parameters with an elegant layout.

## Flexible docking solution

BeneFusion nDS is flexible enough to provide a comprehensive solution for a variety of infusion scenarios.

- Tool-free modular design enables easier expansion of slots from 2 to 24 pumps
- BeneFusion tDS transfer docking station enables simple and efficient patient transfers

#### One-handed plug and play

Smooth and easy slot-in loading of pumps into the docking station.

#### Automatic multi -channel relay

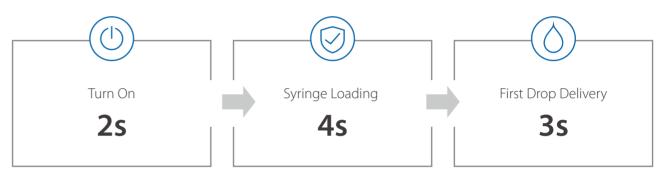

Circular and customized relay together guarantee a stable drug-administering process.

## **Dedicated to safety**

## Innovative technologies ensures safe medication

#### SmartRapid

SmartRapid ensures timely infusion by significantly shortening the start-up time, from turning on the pump to delivering the first drop of medication.

#### Precise and consistent performance

- Rivalled accuracy: nSP  $\leq \pm 1.8\%$ ; nVP  $\leq \pm 5\%$
- Flow rate initiates as precise as 0.01ml/h
- Compatible syringes as small as 1ml

#### SmartAIR

SmartAIR enhances the overall safety by monitoring air-in-line issues when administering infusion to a patient.

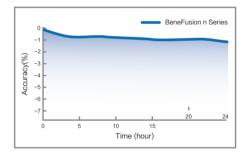

#### SmartAIR Dual

Dual-sensor design of air bubble detection ensures a precise air-in-line alarm.

#### SmartAIR Empty

The innovative mechanism of empty container detection ensures timely awareness of infusion completion without any accessory.

## Dynamic Pressure System (DPS)

Speedometer style indicator with numerical pressure to monitor the in-line pressure trend just with a glance.

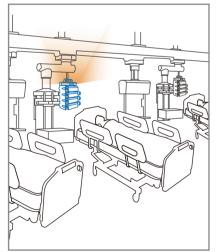

Alert with a visual message about the possible occlusion before interrupting the infusion.

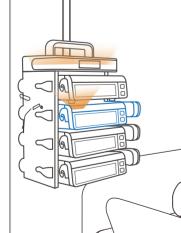

450 Auto-attempting mechanism enables infusion resume as early as possible to ensure continuous infusion.

## Guided Alarm Management

The highly visible alarm management enables users to fast locate and solve the problem.

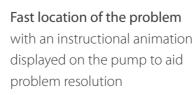

25

Fast location of the bedside alarm with 270° visible alarm light on the BeneFusion nDS from a distance.

Fast location of the pump with an audible and visual alarm on BeneFusion nSP/nVP at bedside. displayed on the pump to aid

## Managing drugs safely throughout the infusion

### Color-coding system

- The color coding of drug name assists users to easily select and verify the correct drug. - SafeDose<sup>™</sup> Info software enables programming infusion parameters automatically to enhance efficiency.

### InfusionView

- Vital sign trend and alarm statistics align with the infusion information to provide a comprehensive understanding of a patient's condition.

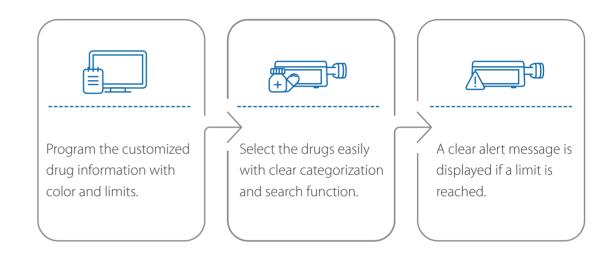

- Guides users with the appropriate dose of drug when adjusting the infusion treatment.

- Assists users to optimize with more precise prescription by reviewing previous treatment up to 24h.

## SafeDose<sup>™</sup> DERS

The SafeDose<sup>™</sup> DERS helps to reduce drug errors by preventing users from exceeding pre-set hard limits, and by requiring confirmation to override soft limits.

### Easy maintenance

- Manufacturing consistency establishes the foundation for easy maintenance

- Save plenty of time for BMEs with pre-configured consumables
- Simplify set calibration by uploading and distributing data easily

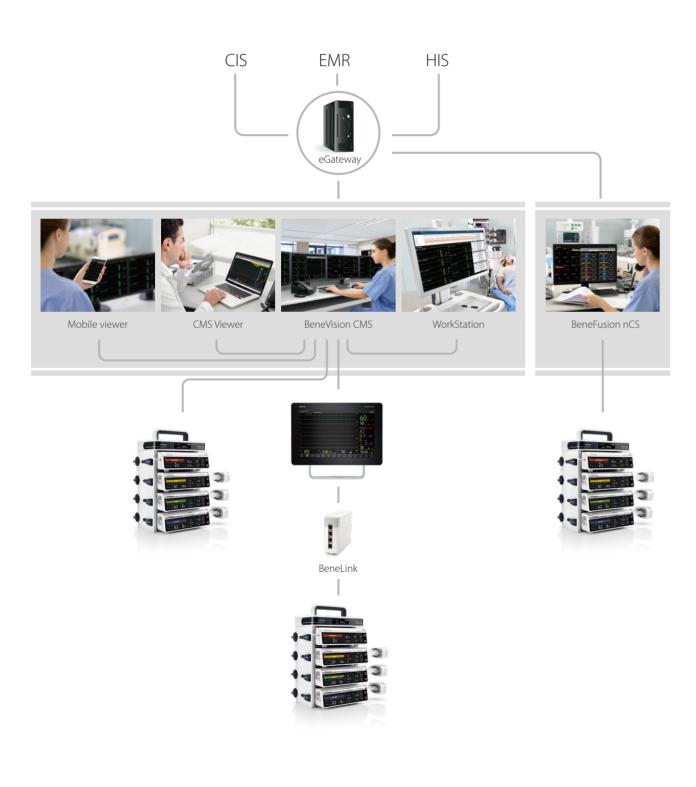

## **Connected synergy**

### Centralized data management

- Able to monitor up to 72 nDS simultaneously
- Able to obtain infusion and alarm information anywhere at anytime
- Access to HIS/CIS/EMR through HL7 protocol

## Integrated central monitoring

BeneVision CMS offers one-stop monitoring of all patients' vital sign and infusion treatment details, providing comprehensive information for clinical workers to improve the quality of patient care.

# Closed-loop medication management

Assists clinical staff to reduce medication errors with barcode scanner by aligning prescription automatically, enhancing the work-flow efficiency.
